SUMMARY

Frontend Engineer with 5+ years of experience building scalable, high-performance web applications using Angular, TypeScript, and JavaScript (ES6+). Experienced in Angular evolution from AngularJS and Angular 11 migrations through to modern Angular architectures leveraging Standalone Components, Signals and RxJS. Strong background in component-driven design, performance optimisation, state management, accessibility, and Agile delivery, with additional experience across React ecosystems.

EXPERIENCE

Frontend Engineer

05/2022 – 06/2025

IS2

- Architected and developed enterprise-scale web applications using modern Angular, TypeScript, RxJS, Standalone Components, and Angular Signals.
- Built reusable, component-driven architectures and shared libraries that improved maintainability, scalability, and development efficiency.
- Developed responsive and accessible user interfaces using Angular Material and modern design systems, ensuring consistency across applications.
- Collaborated closely with UX/UI designers using Figma to translate prototypes and design specifications into production-ready user experiences.
- Developed and integrated RESTful APIs, implementing reactive data flows and robust error-handling strategies using RxJS.
- Applied Angular Signals, dependency injection, data binding, and reactive programming patterns to create performant and maintainable applications.
- Optimised application performance through lazy loading, route-level code splitting, OnPush change detection, tree shaking, and bundle-size optimisation.
- Led end-to-end feature development from requirements gathering through deployment, including code reviews, unit testing (Jasmine/Karma), and integration testing.
- Established frontend best practices covering modular architecture, reusable components, clean code principles, and performance-focused development.
- Mentored junior developers through technical guidance, peer reviews, and knowledge-sharing sessions.
- Contributed to CI/CD processes using Git, npm/yarn, Webpack, ESLint, and automated deployment pipelines.
- Worked within Agile/Scrum teams, participating in sprint planning, backlog refinement, estimation, and iterative product delivery.

Developer 2 - Software Engineering

07/2019 – 01/2022

UST

- Developed and maintained customer-facing web applications using Angular 11, TypeScript, HTML5, CSS3, Bootstrap, and Angular Material.
- Played a key role in migrating a large-scale application from AngularJS to Angular 11, improving maintainability, performance, and long-term scalability.
- Designed and implemented reusable Angular components, services, dependency injection patterns, and reactive data flows using RxJS.
- Integrated and maintained RESTful APIs, ensuring secure and efficient communication between frontend and backend services.
- Developed comprehensive unit tests using Jasmine and Karma, improving application reliability and reducing production defects.
- Delivered multiple customer-requested enhancements and critical feature tracks while balancing competing priorities and deadlines.
- Collaborated with designers and business stakeholders to translate requirements into intuitive and responsive user interfaces.
- Participated in Agile ceremonies including sprint planning, stand-ups, retrospectives, and collaborative development activities.

- Contributed to peer programming, code reviews, and knowledge-sharing initiatives to improve team-wide engineering standards.

EDUCATION

MTech Electronics and Communication Engineering

Sree Buddha College of Engineering - Elavumthitta

08/2015 – 06/2017

Elavumthitta

BTech Communication Engineering

Sree Buddha College of Engineering - Elavumthitta

08/2010 – 11/2014

Elavumthitta

SKILLS

- Angular 21
- Typescript
- HTML5
- CSS3
- Git
- Angular Material Design
- Context API
- Tailwind
- Agile Methodologies
- Jest
- JavaScript (ES6+)
- Restful APIs
- Bootstrap
- UI/UX
- RXJS
- GraphQL
- Redux
- Angular JS
- Vue.JS
- Jasmine/Karma

CERTIFICATES

Advanced React

Meta 01/2026 - Present

React Basics

Meta 06/2025 - Present

PROJECTS

Sree's Kitchen

03/2026 – Present

- Developed a restaurant web app using HTML, CSS, JavaScript, Tailwind and GraphQL.
- Implemented a mock GraphQL backend to simulate menu and category data.
- Used GraphQL queries for efficient dynamic content loading.
- Styled all pages with Tailwind for a clean, responsive UI.
- Added interactive JS features such as menu filtering and animations.
- Structured code into modular, maintainable components.

Remote Job Finder

12/2025 – 01/2026

- Built a remote job search app using Angular 21, Tailwind CSS and TypeScript.
- Integrated the Remotive public API to display live remote job listings.
- Designed a responsive UI with Tailwind for fast, consistent styling.
- Applied strong TypeScript typing and modular Angular components.

Portfolio

10/2025 – 11/2025

- Built a simple, responsive personal portfolio using HTML, CSS and JavaScript.
- Designed clean layouts and styling with CSS.
- Added small interactive features using JavaScript
