SUMMARY

Front-End Engineer with 5+ years of experience building scalable, high-performance SaaS applications using Vue.js, Vue 3, Composition API, Angular, TypeScript and modern JavaScript. Strong background in component-based architecture, REST API integration, performance optimisation, accessibility, and CI/CD workflows. Experienced in leading front-end initiatives, mentoring engineers, collaborating with product/design teams, and shaping engineering best practices. Passionate about building exceptional user experiences and contributing to modern, cloud-ready front-end platforms.

PROFESSIONAL EXPERIENCE

Frontend Engineer

05/2022 – 06/2025

IS2

- Built production-ready Vue.js applications using Vue 3, Composition API and modern state management patterns, delivering scalable components and improved performance across devices.
- Transformed UI/UX wireframes into polished, production-ready interfaces using Figma and JustInMind, ensuring visual consistency and design accuracy.
- Implemented Vue state management, Composition API patterns and lifecycle hooks to build maintainable, scalable components.
- Developed and maintained navigation flows using Vue Router, improving user experience and application structure.
- Optimised front-end performance and accessibility, reducing load times and ensuring WCAG-compliant user experiences that improved overall satisfaction.
- Maintained live systems and resolved production issues, ensuring high availability and reliable platform performance.
- Conducted code reviews and performed advanced debugging using Chrome DevTools to improve code quality and uphold engineering standards.
- Collaborated with cross-functional teams to deliver business-aligned solutions and contribute to product direction.
- Worked with automated testing frameworks such as Jest and Playwright to ensure robust, high-quality releases.
- Proficient in Git and Agile workflows, contributing to efficient delivery using Azure Boards.

Developer 2 - Software Engineering

07/2019 – 01/2022

UST

- Maintained high-quality frontend development using Angular, HTML5, Bootstrap, TypeScript and CSS3, contributing to visually appealing and functional user interfaces.
- Managed critical tracks, including migrating the application UI from AngularJS to Angular 11, enhancing performance and maintainability.
- Developed and maintained RESTful APIs, ensuring efficient and secure data communication.
- Utilised test frameworks Karma and Jasmine for unit testing, ensuring robust and reliable application performance.
- Contributed to multiple customer-demand tracks, showcasing adaptability and the ability to manage priorities effectively.
- Designed user interfaces with Angular Material Design and collaborated on prototypes using Figma.
- Applied advanced techniques like Rxjs, NgRx, dependency injection and data binding for efficient application architecture.
- Worked in Agile Scrum teams, ensuring seamless collaboration and timely delivery of features.
- Collaborated closely with peers through pairing and knowledge sharing to drive quality outcomes.

EDUCATION

Masters - Communication Engineering

08/2015 – 06/2017

Sree Buddha College of Engineering - Elavumthitta

Bachelors - Electronics and Communication Engineering

08/2010 – 11/2014

Sree Buddha College of Engineering

SKILLS

- Vue 3
- Typescript
- CSS3
- Angular 20
- Node js
- Bootstrap
- Figma
- Agile Methodologies
- GraphQL
- JavaScript (ES6+)
- HTML5
- Restful APIs
- Tailwind
- RXJS
- CI/CD
- Git
- Jest
- Playwright

CERTIFICATES

- Advanced React - Meta [↗](#)
- React Basics - Meta [↗](#)

PROJECTS

Sree's Kitchen [↗](#)

03/2016 – Present

A Restaurant Web App

- Developed a restaurant web app using HTML, CSS, JavaScript, Tailwind and GraphQL.
- Implemented a mock GraphQL backend to simulate menu and category data.
- Used GraphQL queries for efficient dynamic content loading.
- Styled all pages with Tailwind for a clean, responsive UI.
- Added interactive JS features such as menu filtering and animations.
- Structured code into modular, maintainable components.

Remote Job Finder [↗](#)

12/2025 – 01/2026

- Built a remote job search app using Angular 21, Tailwind CSS and TypeScript.
- Integrated the Remotive public API to display live remote job listings.
- Designed a responsive UI with Tailwind for fast, consistent styling.
- Applied strong TypeScript typing and modular Angular components.

Portfolio [↗](#)

- Built a simple, responsive personal portfolio using HTML, CSS and JavaScript.
- Designed clean layouts and styling with CSS.
- Added small interactive features using JavaScript.
